U.S. Patent and Trademark Office PTO-326 (Rev. 04-01)

Application/Control Number: 09/701,933

Art Unit: 3738

The Final rejection dated 7/2/03 has been withdrawn. The priority date for applicant's embodiment shown is figures 8A-8c is 8/27/97; the priority date for the embodiment shown in figures 8D-8F is 8/27/98.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 62-68 are rejected under 35 U.S.C. 102(e) as being **clearly anticipated** by Paul et al (6,258,125). Note these claims are directed to the embodiment shown in Figures 8D-8F.

Paul et al teach a bone implant comprising a substantially planar upper and lower surfaces, an anterior end and a posterior end, a first side wall and second side wall

Application/Control Number: 09/701,933

Art Unit: 3738

opposite said first side wall, wherein the first and second side walls extend between the planar surfaces, and wherein the second side wall comprising a concave surface. See figure 9 showing two implants useable together.

Claims 59-66, 68-70 are rejected under 35 U.S.C. 102(e) as being anticipated by Stroever et al (5,728,159).

Referring to figure 2, Stroever teaches a bone implant comprising a substantially planar upper and lower surfaces, an anterior end and a posterior end, a first side wall and second side wall opposite said first side wall, wherein the first and second side walls extend between the planar surfaces, and wherein the second side wall (indicated as P) comprises a concave surface and the first wall (A) comprises a convex surface.

Also see the embodiment shown in figure 1 having concave walls L and M.

Regarding claims 62-63, the measurement close to the walls L and M would fulfill the claimed dimensions.

Regarding claims 69-70, the embodiment shown in figure 1 would have the second side wall face inwardly.

Claims 59-71 are rejected under 35 U.S.C. 102(e) as being anticipated by Pafford (6,371,988).

Referring to all figures, specifically figures 29-32, Pafford teaches a bone implant comprising a substantially planar upper and lower surfaces, an anterior end and a posterior end, a first side wall and second side wall opposite said first side wall, wherein

Application/Control Number: 09/701,933

Art Unit: 3738

the first and second side walls extend between the planar surfaces, and wherein the second side wall comprises a concave surface and the first wall comprises a convex surface. Note the second side wall is interpreted an interior wall.

Additionally, referring to all figures specifically figures 25 and 28, Pafford teaches a bone implant comprising a substantially planar upper and lower surfaces, an anterior end and a posterior end, a first side wall and second side wall opposite said first side wall, wherein the first and second side walls extend between the planar surfaces, and wherein the second side wall comprises a concave surface (right side in figure 25) and the first wall (left side in figure 25) comprises a convex surface.

Regarding claims 62-63, the measurement close to the walls L and M would fulfill the claimed dimensions.

Regarding claims 69-70, the concave side wall faces inwardly.

Conclusion

Applicant's amendment including adding language such as "planar surface" to claim 1 necessitated the new ground(s) of rejection presented in this Office action.

Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce E Snow whose telephone number is (703) 308-3255. The examiner can normally be reached on Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (703)308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3590 for regular communications and (703) 305-3590 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
